Important information about your ACP monthly benefit

Unfortunately, your Affordable Connectivity Program (ACP) monthly benefit, the government program providing a discount on your internet service, will end unless Congress approves additional funding. **Your final full ACP discount will appear on your April month's invoice**, and your May bill will increase by the amount of your ACP discount unless the government provides partial or additional funding.

No action is needed from you at this time, but you can make changes to your services at any time to help manage your bill.

Thank You
